Laser Additive Manufacturing of High-Performance Materials

Dongdong Gu

Laser Additive Manufacturing of High-Performance Materials Dongdong Gu

This book entitled “Laser Additive Manufacturing of High-Performance Materials” covers the specific aspects of laser additive manufacturing of high-performance new materials components based on an unconventional materials incremental manufacturing philosophy, in terms of materials design and preparation, process control and optimization and theories of physical and chemical metallurgy. This book describes the capabilities and characteristics of the development of new metallic materials components by laser additive manufacturing process, including nanostructured materials, *in situ* composite materials, particle reinforced metal matrix composites, etc. The topics presented in this book, similar as laser additive manufacturing technology itself, show a significant interdisciplinary feature, integrating laser technology, materials science, metallurgical engineering and mechanical engineering. This is a book for researchers, students, practicing engineers and manufacturing industry professionals interested in laser additive manufacturing and laser materials processing. Dongdong Gu is a Professor at College of Materials Science and Technology, Nanjing University of Aeronautics and Astronautics (NUAA), PR China.

From reader reviews:

Jennifer Carter:

Have you spare time for just a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a stroll, shopping, or went to typically the Mall. How about open or read a book eligible Laser Additive Manufacturing of High-Performance Materials? Maybe it is to get best activity for you. You recognize beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with their opinion or you have additional opinion?

James Blouin:

Book will be written, printed, or outlined for everything. You can understand everything you want by a e-book. Book has a different type. As it is known to us that book is important matter to bring us around the world. Beside that you can your reading expertise was fluently. A e-book Laser Additive Manufacturing of High-Performance Materials will make you to possibly be smarter. You can feel far more confidence if you can know about almost everything. But some of you think that will open or reading some sort of book make you bored. It is not make you fun. Why they are often thought like that? Have you in search of best book or appropriate book with you?

Mitchell Peed:

This Laser Additive Manufacturing of High-Performance Materials usually are reliable for you who want to become a successful person, why. The reason of this Laser Additive Manufacturing of High-Performance Materials can be one of several great books you must have is usually giving you more than just simple reading through food but feed you actually with information that might be will shock your earlier knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions in the e-book and printed ones. Beside that this Laser Additive Manufacturing of High-Performance Materials forcing you to have an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we know it useful in your day activity. So , let's have it and revel in reading.

Pilar Porter:

Is it you who having spare time after that spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This Laser Additive Manufacturing of High-Performance Materials can be the response, oh how comes? It's a book you know. You are and so out of date, spending your time by reading in this brand new era is common not a geek activity. So what these publications have than the others?
