The Sense of Touch and Its Rendering: Progress in Haptics Research (Springer Tracts in Advanced Robotics)

The Sense of Touch and Its Rendering: Progress in Haptics Research (Springer Tracts in Advanced Robotics)

"Sense of Touch and its Rendering" presents a unique and interdisciplinary approach highlighting the field of haptic research from a neuropsychological as well as a technological point of view. This edited book is the outcome of the TOUCH-HapSys European research project and provides an important contribution towards a new generation of high-fidelity haptic display technologies. The book is structured in two parts: A. Fundamental Psychophysical and Neuropsychological Research and B. Technology and Applications. The two parts are not however separated, and the many connections and synergies between the two complementary domains of research are highlighted in the text. The eleven chapters discuss the recent advances in the study of human haptic (kinaesthetic, tactile, temperature) and multimodal (visual, auditory, haptic) perception mechanisms. Besides the theoretical advancement, the contributions survey the state of the art in the field, report a number of practical applications to real systems, and discuss possible future developments.

From reader reviews:

Nathan Herr:

The book *The Sense of Touch and Its Rendering: Progress in Haptics Research* (Springer Tracts in Advanced Robotics) can give more knowledge and also the precise product information about everything you want. Why must we leave the best thing like a book *The Sense of Touch and Its Rendering: Progress in Haptics Research* (Springer Tracts in Advanced Robotics)? Wide variety you have a different opinion about e-book. But one aim in which book can give many data for us. It is absolutely appropriate. Right now, try to closer with your book. Knowledge or details that you take for that, you could give for each other; it is possible to share all of these. Book *The Sense of Touch and Its Rendering: Progress in Haptics Research* (Springer Tracts in Advanced Robotics) has simple shape nevertheless, you know: it has great and large function for you. You can appearance the enormous world by wide open and read a reserve. So it is very wonderful.

James Bauer:

This *The Sense of Touch and Its Rendering: Progress in Haptics Research* (Springer Tracts in Advanced Robotics) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is definitely information inside this guide incredible fresh, you will get details which is getting deeper you actually read a lot of information you will get. This kind of *The Sense of Touch and Its Rendering: Progress in Haptics Research* (Springer Tracts in Advanced Robotics) without we know teach the one who studying it become critical in pondering and analyzing. Don't become worry *The Sense of Touch and Its Rendering: Progress in Haptics Research* (Springer Tracts in Advanced Robotics) can bring whenever you are and not make your tote space or bookshelves' become full because you can have it within your lovely laptop even mobile phone. This *The Sense of Touch and Its Rendering: Progress in Haptics Research* (Springer Tracts in Advanced Robotics) having excellent arrangement in word along with layout, so you will not experience uninterested in reading.

Stacey Eades:

This book untitled *The Sense of Touch and Its Rendering: Progress in Haptics Research* (Springer Tracts in Advanced Robotics) to be one of several books in which best seller in this year, that's because when you read this guide you can get a lot of benefit upon it. You will easily to buy that book in the book retail store or you can order it by way of online. The publisher on this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smart phone. So there is no reason for you to past this guide from your list.

Elda Baggett:

People live in this new time of lifestyle always attempt to and must have the time or they will get lot of stress from both everyday life and work. So , once we ask do people have time, we will say absolutely indeed. People is human not really a robot. Then we ask again, what kind of activity are there when the spare time

coming to you actually of course your answer may unlimited right. Then ever try this one, reading publications. It can be your alternative with spending your spare time, often the book you have read is definitely The Sense of Touch and Its Rendering: Progress in Haptics Research (Springer Tracts in Advanced Robotics).
