Geologic Hazards: A Field Guide for Geotechnical Engineers

Roy E. Hunt

Geologic Hazards: A Field Guide for Geotechnical Engineers Roy E. Hunt

Geologic hazards pose the greatest threat to human safety for any geotechnical undertaking, but it is ultimately the engineer's ability to recognize and cope with these hazards that will determine the safety of life and property. Armed with Geologic Hazards: A Field Guide for Geotechnical Engineers you will be able to properly recognize, understand various geologic hazards, and provide safe and economical construction. Eminent expert Roy E. Hunt thoroughly examines the potential for slope failures, earthquakes, ground subsidence, collapse, and expansion. Using a clear conceptual approach, he explains what measures are available to minimize or eliminate the risks associated with each of these geologic hazards.

The book sets forth the basis for recognizing, understanding, and treating geologic hazards, using general concepts rather than rigorous mathematical analyses. The author covers the prediction of slope failures through recognition of geologic and other factors that govern failure, the treatment of slopes that are potentially unstable and pose a danger to some existing development, the design and construction of stable cut slopes and sidehill fills, and the stabilization of failed slopes. He provides the foundation for determining the potential for surface movements and for preventing or controlling their effects. A section on earthquakes summarizes and links all of the aspects of earthquakes including their causes, characteristics, and surface effects. It provides a thorough grounding in how to recognize hazard potential and minimize the consequences.

There is no field within geotechnical engineering in which the state of the art is changing so rapidly. Providing the latest information, this resource is a useful tool for designing new projects and redesigning old ones.

From reader reviews:

Betty Lavery:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite guide and reading a guide. Beside you can solve your condition; you can add your knowledge by the guide entitled Geologic Hazards: A Field Guide for Geotechnical Engineers. Try to the actual book Geologic Hazards: A Field Guide for Geotechnical Engineers as your pal. It means that it can to become your friend when you sense alone and beside that of course make you smarter than ever. Yeah, it is very fortuned for yourself. The book makes you far more confidence because you can know every little thing by the book. So , we should make new experience and also knowledge with this book.

Brad Hawkes:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your day time to upgrading your mind skill or thinking skill also analytical thinking? Then you are receiving problem with the book as compared to can satisfy your small amount of time to read it because this time you only find guide that need more time to be examine. Geologic Hazards: A Field Guide for Geotechnical Engineers can be your answer since it can be read by you actually who have those short extra time problems.

Rosalyn Kendall:

Within this era which is the greater person or who has ability in doing something more are more special than other. Do you want to become considered one of it? It is just simple approach to have that. What you are related is just spending your time little but quite enough to have a look at some books. One of many books in the top record in your reading list is actually Geologic Hazards: A Field Guide for Geotechnical Engineers. This book which is qualified as The Hungry Inclines can get you closer in turning into precious person. By looking upward and review this publication you can get many advantages.

Shanon Stephens:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is written or printed or highlighted from each source that will filled update of news. With this modern era like currently, many ways to get information are available for anyone. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just searching for the Geologic Hazards: A Field Guide for Geotechnical Engineers when you desired it?
