Hands-On Science Mysteries for Grades 3 - 6: Standards-Based Inquiry Investigations James Robert Taris, Louis James Taris

In *Hands-On Science Mysteries for Grades 3-6*, the authors connect science to real-world situations by investigating actual mysteries and phenomena, such as the strange heads on Easter Island, the ghost ship *Mary Celeste*, and the “Dancing Stones” of Death Valley. The labs are designed to encourage the development of science inquiry, in which students will observe, take notes, make diagrams, interpret data, and arrive at solutions, and include extensions for further investigation.
