Thinking Through Systems Thinking Ion Georgiou

Systemicity is receiving wider attention thanks to its evident paradox. On the one hand, it occurs as a problem with complex symptoms. On the other, it is sought after as an approach for dealing with the non-linear reality of the world. At once problem and prize, systemicity continues to confound. This book details the mechanics of this paradox as they arise from human epistemological engagement with the world.

Guided by an original analysis of the fundamental idea of emergent property, *Thinking Through Systems Thinking* uncovers the distinct significance, but also incompleteness, of the systems approach as a theory of human epistemological engagement. The incompleteness is treated through a non-eclectic interdisciplinary investigation which meets ten distinctly developed criteria required of any potential interdisciplinary partner to systems thinking. There results a theory of knowledge - an epistemology - which is systemic in both senses of the term: it belongs to the general systems movement, and it is systemically structured. The systems movement is thus offered a distinct epistemological voice which can compete on equal ground with other philosophical/epistemological positions. In true systemic fashion, this theory of knowledge also offers methodological, ethical, and existential implications.

The book provides:

- a complete systems science epistemology built upon the idea of emergent property;
- a developed system theoretical understanding of consciousness, hence contributing to studies of consciousness in general and, moreover, to the understanding of the manner in which human beings engage epistemologically with the world;
- a detailed analysis of the relationship between emergent properties and the wholes which exhibit them;
- an in-depth explication of the fundamental importance of the idea of emergent property to system science;
- epistemological insights into some of the core ideas of systems science such as emergent property and boundary critique - indeed, the book's treatment of the former idea is unique in the system science literature and provides an advanced epistemological understanding of this idea;
- a fresh, and distinctly epistemological, understanding of von Bertalanffy's pioneering general system theory - an understanding which has served to also demonstrate the continuing relevance of the original ideas behind the contemporary face of systems science, and the manner in which such ideas sit well with phenomenology;
- a systemic understanding of two cornerstones of Husserlian phenomenology: intentionality and intuition;
- an introduction, detailed treatment, and delimitation of the epistemological ideas of dogmatism and bounded rationality;
- an original, epistemologically-focused critique of the idea of boundary analysis/boundary judgements;
- an original, epistemological treatment of the idea of alienation, further demonstrated as permeating systems science and phenomenology; and,
- an application for the development of organizational learning and knowledge management.

From reader reviews:

Eric Graves:

Reading a e-book can be one of a lot of action that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people love it. First reading a book will give you a lot of new information. When you read a publication you will get new information because book is one of a number of ways to share the information or even their idea. Second, examining a book will make an individual more imaginative. When you reading through a book especially fictional book the author will bring someone to imagine the story how the character types do it anything. Third, it is possible to share your knowledge to some others. When you read this Thinking Through Systems Thinking, you can tells your family, friends and also soon about yours publication. Your knowledge can inspire others, make them reading a guide.

Jackie Lafond:

The reason why? Because this Thinking Through Systems Thinking is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will shock you with the secret the item inside. Reading this book close to it was fantastic author who all write the book in such incredible way makes the content inside of easier to understand, entertaining means but still convey the meaning completely. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This amazing book will give you a lot of gains than the other book get such as help improving your expertise and your critical thinking means. So , still want to hold up having that book? If I ended up you I will go to the publication store hurriedly.

Gene Green:

That e-book can make you to feel relax. This book Thinking Through Systems Thinking was colorful and of course has pictures on there. As we know that book Thinking Through Systems Thinking has many kinds or variety. Start from kids until teens. For example Naruto or Detective Conan you can read and think you are the character on there. So , not at all of book usually are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading this.

Gail Nugent:

A number of people said that they feel fed up when they reading a e-book. They are directly felt that when they get a half portions of the book. You can choose the particular book Thinking Through Systems Thinking to make your reading is interesting. Your own personal skill of reading skill is developing when you such as reading. Try to choose easy book to make you enjoy to see it and mingle the idea about book and examining especially. It is to be initial opinion for you to like to open a book and go through it. Beside that the guide Thinking Through Systems Thinking can to be your brand-new friend when you're really feel alone and confuse with the information must you're doing of their time.
