## 30 Simple Energy Things You Can Do to Save the Earth

If each U.S. household increased the energy efficiency of our major appliances by 10 to 30%, we'd reduce the demand for electricity by the equivalent of 25 large power plants. Substituting a compact fluorescent light for a traditional bulb will keep a half-ton of CO2 out of the atmosphere over the life of the bulb. If we all installed 'low-flow' shower heads, we could save billions of gallons of water every year...without ever noticing it. If every American family planted just one tree, over a billion pounds of 'greenhouse gases' would be removed from the atmosphere every year. It all begins with YOU, & the things you do every day at home. 30 Simple Things gives you a clear, entertaining idea of how you can save energy... & help protect the Earth.
