Handbook of Fluorescent Dyes and Probes

R. W. Sabnis

Handbook of Fluorescent Dyes and Probes R. W. Sabnis

A COMPLETE, UP-TO-DATE RESOURCE OF INFORMATION ON MORE THAN 150
FLUORESCENT DYES AND PROBES

"Handbook of Fluorescent Dyes and Probes" is the most comprehensive volume available on the subject, covering all the available dyes and probes known to date in the literature for uses in various fields. Top dye expert Dr. Ram Sabnis organizes the compounds alphabetically by the most commonly used chemical name. He presents an easy-to-use reference complete with novel ideas for breakthrough research in medical, biological, chemical, color, material, physical and related allied fields. The ease of use of the handbook is further enhanced by various appendixes provided at the end of the book to conveniently and easily locate the dye as per the reader's need.

This is the first book to give the CAS registry numbers, chemical structure, Chemical Abstract (CA) index name, all other chemical names, Merck Index number, chemical/dye class, molecular formula, molecular weight, physical form, solubility, melting point, boiling point, pKa, absorption maxima, emission maxima, molar extinction coefficient, and quantum yield of fluorescent dyes and probes, as well as to provide access to synthetic procedures (lab scale and industrial scale) of dyes and probes in a single source. This user-friendly handbook also features references on safety, toxicity and adverse effects of dyes and probes on humans, animals and the environment, including:

acute/chronic toxicity aquatic

toxicity carcinogenicity cytotoxicity ecotoxicity genotoxicity hematotoxicity hepatotoxicity immunotoxicity marine toxicity microbial toxicity mutagenicity nephrotoxicity neurotoxicity nucleic acid damage oral toxicity phototoxicity phytotoxicity reproductive toxicity skin toxicity

Containing imaging/labeling applications, biological/medical applications and industrial applications, "Handbook of Fluorescent Dyes and Probes" is a convenient, vital resource for industrial and academic researchers, and a valuable desktop reference for medical professionals, lab supervisors, scientists, chemists, biologists, engineers, physicists, intellectual property professionals, students, and professors.

From reader reviews:

Timothy Patrick:

The book Handbook of Fluorescent Dyes and Probes make one feel enjoy for your spare time. You need to use to make your capable much more increase. Book can being your best friend when you getting anxiety or having big problem with your subject. If you can make reading through a book Handbook of Fluorescent Dyes and Probes being your habit, you can get a lot more advantages, like add your personal capable, increase your knowledge about many or all subjects. You may know everything if you like start and read a publication Handbook of Fluorescent Dyes and Probes. Kinds of book are a lot of. It means that, science guide or encyclopedia or other folks. So , how do you think about this guide?

Madeline Pastrana:

Reading can called imagination hangout, why? Because when you find yourself reading a book mainly book entitled Handbook of Fluorescent Dyes and Probes your thoughts will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely can be your mind friends. Imaging just about every word written in a reserve then become one type conclusion and explanation that maybe you never get ahead of. The Handbook of Fluorescent Dyes and Probes giving you another experience more than blown away your brain but also giving you useful facts for your better life with this era. So now let us present to you the relaxing pattern this is your body and mind will be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Arthur Haynes:

Is it anyone who having spare time in that case spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Handbook of Fluorescent Dyes and Probes can be the respond to, oh how comes? The new book you know. You are consequently out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these books have than the others?

Irma Lovern:

As a scholar exactly feel bored to be able to reading. If their teacher asked them to go to the library in order to make summary for some reserve, they are complained. Just little students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to the library. They go to there but nothing reading significantly. Any students feel that examining is not important, boring and also can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Handbook of Fluorescent Dyes and Probes can make you feel more interested to read.
