Mars 3-D: A Rover's-Eye View of the Red Planet Jim Bell

Planetary scientist Jim Bell leads us on another exhilarating tour of the Red Planet—and this revised, expanded edition of *Mars 3-D* includes the latest images from NASA's revolutionary Mars Science Laboratory mission. Brief essays survey the advanced technologies and promising discoveries of the Mars exploration rover program, followed by 150 spectacular full-color and 3-D photos. More than 30 brand-new pictures taken over the past five years reveal the rocks, craters, valleys, and other geologic configurations that define the Martian terrain, while captions explain the various conclusions scientists have drawn about the planet's geological composition. Bell has first-hand experience with both rover missions, and his considerable expertise provides astronomy buffs with a cutting-edge look at this always-intriguing planet. 3-D glasses are included!

From reader reviews:

Maurice Neely:

Reading a guide can be one of a lot of action that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new information. When you read a reserve you will get new information mainly because book is one of several ways to share the information or maybe their idea. Second, studying a book will make you more imaginative. When you reading through a book especially fictional book the author will bring that you imagine the story how the personas do it anything. Third, you can share your knowledge to other individuals. When you read this Mars 3-D: A Rover's-Eye View of the Red Planet, you can tells your family, friends and also soon about yours publication. Your knowledge can inspire the others, make them reading a e-book.

Leola Grant:

This Mars 3-D: A Rover's-Eye View of the Red Planet is great book for you because the content that is full of information for you who also always deal with world and have to make decision every minute. This kind of book reveal it info accurately using great organize word or we can state no rambling sentences inside it. So if you are read that hurriedly you can have whole information in it. Doesn't mean it only will give you straight forward sentences but tough core information with beautiful delivering sentences. Having Mars 3-D: A Rover's-Eye View of the Red Planet in your hand like obtaining the world in your arm, information in it is not ridiculous one. We can say that no guide that offer you world throughout ten or fifteen second right but this guide already do that. So , it is good reading book. Hey there Mr. and Mrs. busy do you still doubt that will?

Heather Stewart:

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some guide, they are complained. Just tiny students that has reading's internal or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that studying is not important, boring and also can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Mars 3-D: A Rover's-Eye View of the Red Planet can make you really feel more interested to read.

Courtney Osteen:

What is your hobby? Have you heard that question when you got college students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every person has different hobby. So you know that little person just like reading or as studying become their hobby. You should know that reading is very important and book as to be the point. Book is important thing to add you knowledge, except your own teacher or lecturer. You get good news or update regarding something by book. A substantial

number of sorts of books that can you take to be your object. One of them is Mars 3-D: A Rover's-Eye View of the Red Planet.
