**Early Hunter-Gatherers of the California Coast (Interdisciplinary Contributions to Archaeology)** Jon Erlandson

Based on detailed excavation data, the author reconstructs the paleogeography of the Santa Barbara coast ca. 8500 years ago, makes comparisons to other early California sites, and applies his findings to current theories of hunter-gatherers and coastal environments. With an emphasis on paleogeographic reconstructions, site formation processes, chronological studies, and integrated faunal analyses, the work will be of interest to a wide range of scholars working in shell middens, hunter-gatherer ecology, geoarchaeology, and coastal or aquatic adaptations.
