Teaching Atlas of Nuclear Medicine

Kevin J. Donohoe, Annick D. Van den Abbeele

Teaching Atlas of Nuclear Medicine Kevin J. Donohoe, Annick D. Van den Abbeele

Each volume in Thieme's new Teaching Atlas series features a wide range of challenging cases in radiology, and is ideal for both self-assessment and review. All cases stress the real-life presentation of a specific clinical problem, beginning with high-quality radiographs and followed by patient history, radiographic findings, differential-diagnosis, discussion, and suggestions for further reading. Highlighted Pearls, Pitfalls, and Controversial Issues round out the presentation of each case and provide the reader with hundreds of useful hints and recommendations. A must for residents rotating in sub-specialties or studying for board examinations, the Teaching Atlas series is also a useful review for experienced practitioners.

In the TEACHING ATLAS OF NUCLEAR MEDICINE, you'll find comprehensive coverage of the entire field of nuclear medicine through a series of clearly presented cases. Following the board exam format, the cases are presented as unknowns, with an image and brief clinical description; you are then asked to arrive at your own differential diagnosis. Complete with tips, pearls, pitfalls, and a brief discussion of each case, this is the ideal book for self-testing and maximizing your study time.
