Viral Infections of Humans: Epidemiology and Control

Viral Infections of Humans: Epidemiology and Control

Striking changes have occurred in the world since the publication of the last edition of *Viral Infections of Humans*. The global population is rapidly approaching 8 billion; climate change is leading to the introduction of new hosts, vectors and virus diseases heretofore never seen in many parts of the world; technological advances have revolutionized the ability to recognize and characterize viruses new and old; vaccines are altering the epidemiological landscape of the diseases they target, in some cases raising the hope of their eradication and remarkably powerful computational tools are enabling not only detection of outbreaks of disease much sooner than in the past but also, through complex mathematical modeling, more accurate prediction of their potential impact.

The new Fifth Edition of *Viral Infections of Humans* captures the both the excitement and frustration of the dynamic struggle between humankind and the viruses that continue to cause immense suffering. It presents the latest concepts, methods and technologies in epidemiology, detection, investigation, modeling and intervention. Updated and entirely new chapters by dozens of experts across the field provide analytic summaries of current knowledge of viruses and prions causing acute syndromes, chronic illnesses and/or malignancies. In sum, this ambitiously expanded volume offers a uniquely comprehensive perspective on viruses in humans, from agents of classic diseases (e.g., hepatitis, measles, polio, rabies and yellow fever), to those with greatest pandemic impact (e.g., influenza and human immunodeficiency virus), to those discovered relatively recently (e.g., henipavirus, metapneumovirus and norovirus).

The new Fifth Edition of *Viral Infections of Humans* is an invaluable reference for students, fellows and established professionals in the fields of microbiology, public health and infectious disease epidemiology, medicine and health policy.

From reader reviews:

Benny Joiner:

Reading a guide can be one of a lot of activity that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new data. When you read a guide you will get new information due to the fact book is one of several ways to share the information or their idea. Second, reading through a book will make a person more imaginative. When you examining a book especially fiction book the author will bring that you imagine the story how the figures do it anything. Third, you may share your knowledge to other folks. When you read this Viral Infections of Humans: Epidemiology and Control, it is possible to tells your family, friends and also soon about yours e-book. Your knowledge can inspire the others, make them reading a book.

Curtis Dugan:

The reason why? Because this Viral Infections of Humans: Epidemiology and Control is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will surprise you with the secret it inside. Reading this book beside it was fantastic author who have write the book in such remarkable way makes the content within easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of advantages than the other book get such as help improving your ability and your critical thinking technique. So , still want to delay having that book? If I had been you I will go to the e-book store hurriedly.

Marie Guinn:

Are you kind of busy person, only have 10 or 15 minute in your moment to upgrading your mind talent or thinking skill actually analytical thinking? Then you are receiving problem with the book than can satisfy your short space of time to read it because all this time you only find publication that need more time to be learn. Viral Infections of Humans: Epidemiology and Control can be your answer given it can be read by anyone who have those short spare time problems.

Veronica Shriner:

Is it you actually who having spare time subsequently spend it whole day through watching television programs or just lying down on the bed? Do you need something totally new? This Viral Infections of Humans: Epidemiology and Control can be the response, oh how comes? The new book you know. You are consequently out of date, spending your free time by reading in this brand-new era is common not a geek activity. So what these books have than the others?
