## **Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data (Data-Centric Systems and Applications) Bing Liu**

Web mining aims to discover useful information and knowledge from Web hyperlinks, page contents, and usage data. Although Web mining uses many conventional data mining techniques, it is not purely an application of traditional data mining due to the semi-structured and unstructured nature of the Web data. The field has also developed many of its own algorithms and techniques.

Liu has written a comprehensive text on Web mining, which consists of two parts. The first part covers the data mining and machine learning foundations, where all the essential concepts and algorithms of data mining and machine learning are presented. The second part covers the key topics of Web mining, where Web crawling, search, social network analysis, structured data extraction, information integration, opinion mining and sentiment analysis, Web usage mining, query log mining, computational advertising, and recommender systems are all treated both in breadth and in depth. His book thus brings all the related concepts and algorithms together to form an authoritative and coherent text.

The book offers a rich blend of theory and practice. It is suitable for students, researchers and practitioners interested in Web mining and data mining both as a learning text and as a reference book. Professors can readily use it for classes on data mining, Web mining, and text mining. Additional teaching materials such as lecture slides, datasets, and implemented algorithms are available online.

### **From reader reviews:**

#### **Christine Curnutt:**

This book untitled Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data (Data-Centric Systems and Applications) to be one of several books that will best seller in this year, here is because when you read this reserve you can get a lot of benefit into it. You will easily to buy this specific book in the book retail store or you can order it through online. The publisher on this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason for your requirements to past this reserve from your list.

#### **Jose Brummitt:**

Typically the book Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data (Data-Centric Systems and Applications) has a lot of knowledge on it. So when you check out this book you can get a lot of profit. The book was authored by the very famous author. The author makes some research ahead of write this book. This particular book very easy to read you can find the point easily after reading this article book.

#### **Kelly Livingston:**

The book untitled Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data (Data-Centric Systems and Applications) contain a lot of information on it. The writer explains her idea with easy means. The language is very easy to understand all the people, so do certainly not worry, you can easy to read it. The book was written by famous author. The author will bring you in the new period of literary works. You can easily read this book because you can read more your smart phone, or product, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site and also order it. Have a nice study.

#### **Billy Smith:**

You can spend your free time to learn this book this e-book. This Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data (Data-Centric Systems and Applications) is simple to deliver you can read it in the park your car, in the beach, train and also soon. If you did not get much space to bring the printed book, you can buy the e-book. It is make you quicker to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.
